

Coomera Springs State School
HEAD LICE POLICY

Head lice are a problem in all schools from time to time.

Students suspected of having live head lice or eggs present in their hair are not removed from class or school, a letter will be sent home requesting immediate treatment to be commenced.

If head lice are detected within the school an alert notice will be emailed home with a section to be completed and returned to the school.

Head lice can infest any student. They are not confined to clean or dirty hair. We will also put regular articles in our newsletter advising parents to check their children and treat as required.

A student who is repeatedly infected, and repeatedly inadequately treated, maybe referred by the Principal to other agencies for follow up.
